Ring Sizer Instructions

1. Print it – Make sure to print the page at full size, otherwise the sizers will be distorted.
2. Cut it – Clip out the ring sizer and cut a slit along the dotted line.
3. Roll it – With the numbers facing out, insert the pointed end of the sizer through the slit.
4. Size it – Tighten the loop around your finger or toe, making sure to allow enough space for your knuckle, and read your size from the scale.

Or...Measure it!

Use a piece of string to measure the size of your finger and use the chart above to find your size, or use a ring that you know fits and measure it with the guide below!
